Response to Arguments

1. The applicant's arguments regarding prior art rejections under 35 U.S.C. 103(a), filed February 1, 2006, have been fully considered by the Examiner and are persuasive.
2. Regarding the double patenting, although amendments to the claims have been made, the same amendments were made to claim 2 of application 10/780,844 and the claims of 10/781,259. Other than the double patenting rejection, claims 1-3 are in condition for allowance.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-3 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of copending Application Nos. 10/781,228, 10/781,192, 10/781,259, 10/781,147 and 10/780,844. Although the conflicting claims are not identical, they are not patentably distinct from each other because either recite identical or substantially the same limitations with minor alterations such as

Art Unit: 2683

apparatus or method claims instead of the current program product claims. Although amendments to the claims have been made, the same amendments were made to claim 2 of application 10/780,844 and to the claims of application 10/781,259. Other than the double patenting rejection, claims 1-3 are in condition for allowance.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
